Manage Your Monday Morning Trade (BHEL) (Complimentary Section for The Sixth Sense Lovers)

People often ask the question "how to get clarity on next day's Market movement". We are giving you a solution in this section.

First, let us have a look at the most important support and resistance level for BHEL on Monday

As per the information given above, BHEL might be finding strong support at 247.20 and there is a short term support at 252.20. As long as the support at 247.20 is not broken, one may consider the stock positively. Immediate targets for the stock are 260.50 and Cycle Completion will be at 268.50.

NIFTY Weekly Outlook!! 22349 is most crucial level for the week!!

NIFTY made a fresh all time high at 22600 and the index was not able to hold on to the gains. NIFTY is near the next high momentum zone at present and if the zone is broken, it can effectively take index to fresh all time highs near 22716.

The mentioned level 22716 is only the first level cycle completion for NIFTY. The cycle might further extend and it can take the index to 22884 or higher if the cycle is getting extended.

NIFTY Possibility for Cycle Extension

If the cycle is getting extended, NIFTY should take support at 22661 and that level should remain as a strong support after completion of major cycle at 22718. In such scenario, NIFTY cycle extension can be confirmed and index might rush to 22884 immediately.

NIFTY Bearish Possibility

NIFTY will turn bearish only if the index breaks the level 22249. If the said level is broken, markets might fall to 2164 or find support at 22000.

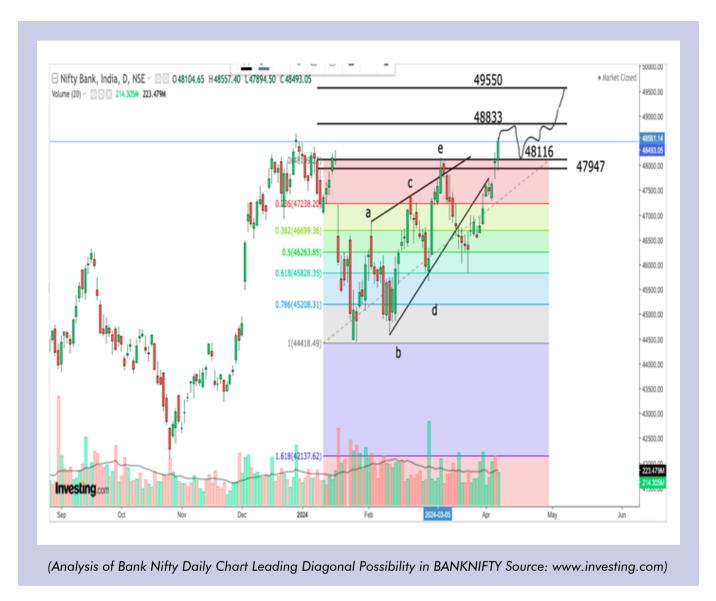

BANKNIFTY Leading Diagonal Possibility Activated

As we discussed in the last episode of Sixth Sense, the five waves movement recorded in BANK-NIFTY in last few weeks can be either a triangle or a leading diagonal. As market is advancing higher, we should change our view to a leading diagonal possibility and BANKNIFTY took support exactly at 61.8% of the entire length of the leading diagonal structure.

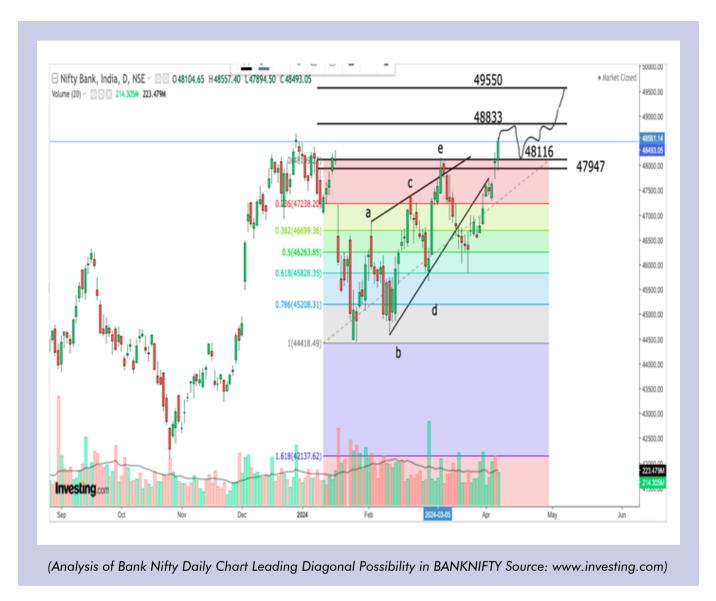

BANKNIFTY High Momentum Zone at 48833. BANKNIFTY Bullish Possibility

Since BANKNIFTY has completed a leading diagonal structure, index might take support at 48116. The said level 48116 will be a crucial support for the index in coming days. After touching the high momentum zone if BANKNIFTY fails from there, index should not break below 48116. As long as the acid test level at 47947 is held, markets should advance higher and might move to 49550.
